## Experience

### Self Employed - Freelance Jan 2017 - Current

Main Projects:

#### - Rhino Assets Hybrid Mobile App

The client requested a cross platform Hybrid mobile app for fuel supply logging, management and reporting.

Features include: create, read, update, and delete, of staff, user clearance levels and assets and usage reporting

#### - Electronic Cost (Intelligent Document Processing)

The project was to modernize law firm billing. It can take between an hour and days to summarise the contents of a legal file to which can have upwards of a thousand pages. The idea was to automate the whole process.

Steps included OCR, document recognition, data extraction, image recognition and manipulation and data processing.

The project was a success with files that normally took 2 days to be processed, being completed in hours.
