EDUCATION

Udemy (Online)
33 Hour The Full Stack Web Developer
Completed Dec 2018

Kapitel Zwei (Berlin, Germany)
German Language Course level B1
Completed Aug 2016

Dive Asia (Phuket, Thailand)
Padi Open Water Scuba Instructor
Completed Nov 2010

High School Overkruin (Pta, South Africa)
National Senior Certificate
Completed Nov 2009

KEY SKILLS

JavaScript
Java
Node.js
Angular
Php
HTML
CSS
PostgreSQL
MongoDB
MySql
RestAPIs

Web Developer

A self-taught developer looking for a chance to gain more experience and to learn in a full stack environment. I have worked on projects ranging from intelligent naming & classification software to voice recognition to mobile applications, back end server and databases.

Experience

Self Employed - Freelance Jan 2017 - Current
Main Projects:
- Rhino Assets Hybrid Mobile App
The client requested a cross platform Hybrid mobile app for fuel supply logging, management and reporting.
Features include: create, read, update, and delete, of staff, user clearance levels and assets and usage reporting
- Electronic Cost (Intelligent Document Processing)
The project was to modernize law firm billing. It can take between an hour and days to summarise the contents of a legal file, which can have upwards of a thousand pages. The idea was to automate the whole process.
Steps included OCR, document recognition, data extraction, image recognition and manipulation and data processing.
The project was a success with files that normally took 2 days to be processed, being completed in hours.

The Stack I use

Front end: JavaScript, Angular/TypeSctipt, PHP, Meteor.js, HTML/CSS, Bootstrap, SCSS
Back end: Node.js, Express.js, Socket.io, Java, Apache2, Lamp, Tomcat
Database: Postgres, Mongo, MySql
Deployment: Heroku, Github
Other: RestAPIs, Apache Cordova, Git, Adobe XD, Npm, Linux

Unrelated Past Experiece

Before starting developing I worked in hospitality, mainly Backpacker Management and Scuba Instructing. I will be happy to supply more detail and references upon request.
